## Bevel of Doors.

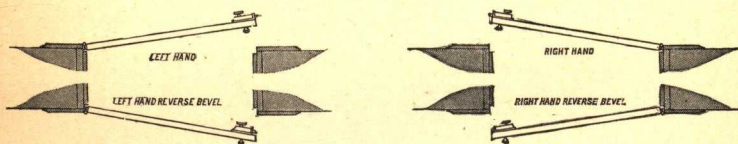

In ordering locks for doors with Special Bevel, be particular to state THICKNESS of DOORS, as measured by one arm of a square, and the amount of bevel, as shown on the other arm.

Illustration shows a bevel of  $\frac{1}{4}$  on  $2\frac{1}{4}$  inches.

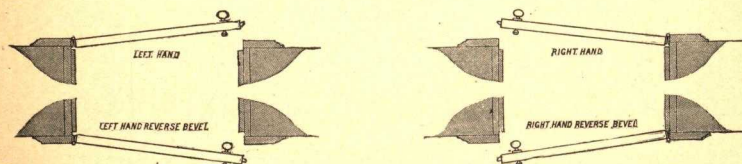

## Hand of Locks.

### RIM LOCKS.

### MORTISE LOCKS.

Doors which require Right Hand REVERSE BEVEL Locks, need Left Hand Butts, and *vice versa*.

" 858	2 1/4 "	" " " Real Bronze Shank and						8.00
" 0858	2 1/4 "	" " " Plain	" " " " " " " "					8.00

Packed with screws.

## Screwless Knobs.

### TO SEPARATE KNOB FROM SPINDLE.

Unscrew outer Sleeve, pull off Knob, unscrew the inner Sleeve (the one with two pins), and remove outer Sleeve and Rose.

### TO APPLY KNOB TO DOOR.

Insert Spindle through the hole in door, slip on Rose and outer Sleeve, screw inner Sleeve tight against shoulder of outer Sleeve; this will bring Rose in alignment with Spindle. Screw Rose on door. Turn back inner Sleeve until pins are opposite the squares of Spindle. Slip on Knob, the pins of inner Sleeve to enter holes in Knob Shank. Screw outer Sleeve and Knob Shank together tightly, with wrench.

Any of our better grade of Real Bronze Knobs (see pages 1 to 92 inclusive) will be made up with Screwless Attachment, if so ordered, at an additional cost of \$12.00 per dozen pairs, *list*.

## Swivel Spindles.

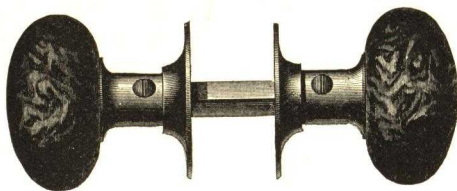

5-16 x  $\frac{3}{8}$  inch.

The construction of this Spindle is shown in the above illustration. The increased diameter of one end of the Spindle permits the Swivel to be made as strong as the threaded portion of a  $\frac{3}{8}$  inch Spindle, and the difference of diameter between the two parts of the Spindle (and the corresponding difference of size in the two parts of the Lock-Hub) greatly facilitates and simplifies the adjustment of Knobs and Spindle to the Lock.

This Spindle is used with all numbers of Columbia Locks which require a Swivel Spindle.

## Cupboard Knobs.

No. 1500  $\frac{1}{4}$ .

5-16 INCH SPINDLES.

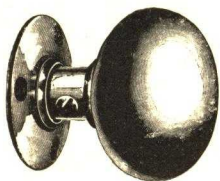

## MINERAL.
